

HR Shortlist Report

Role: Senior React Developer

Generated: 9/5/2026, 7:24:41 pm | Candidates evaluated: 5 | Hire threshold: 6/10

Job Requirements Summary

Domain: Fintech
Min Experience: 5 years
Education: B.Tech / B.E. in Computer Science or related field
Required Skills: React.js, TypeScript, React Hooks, Context API, Redux, Zustand, Recoil, React Query, SWR, Tailwind CSS, styled-components, Vite, Webpack, Jest, React Testing Library, Git, CI/CD, RESTful APIs, GraphQL, Next.js, Remix, Apollo Client, AWS, S3, CloudFront, Lambda, micro-frontend architecture

#1 Arjun Mehta ' HIRE Total: 8.65/10

Experience: 6 yrs | Education: B.Tech in Computer Science, IIT Bangalore (2018)
Skills: React.js, TypeScript, JavaScript (ES6+), Redux, Zustand, React Query, Next.js, Tailwind CSS, Vite, Jest

Dimension Scores:

Skills Match (30%): 9/10 [weighted: 2.70]
! Candidate possesses 18 out of 27 required skills (~67%), including all critical ones: React.js, TypeScript, Redux, Zustand, React Query, Next.js, Tailwind CSS, Vite, Jest, React Testing Library, GraphQL, AWS (S3, Lambda), CI/CD, and Git. Missing: React Hooks (likely implied), Context API, Recoil, SWR, styled-components, Webpack, Remix, Apollo Client, CloudFront, and micro-frontend architecture. Strong coverage of core requirements with modern stack expertise.

Experience Relevance (25%): 7/10 [weighted: 1.75]
! Candidate has 6 years of experience, exceeding the 5-year requirement. However, the domain mismatch is significant—projects indicate e-commerce, open-source dashboards, and design systems rather than fintech-specific work. Experience level and technical seniority align well, but lack of demonstrated fintech domain expertise (payments, banking, financial compliance, trading platforms) reduces relevance score.

Education & Certifications (15%): 10/10 [weighted: 1.50]
! Candidate holds a B.Tech in Computer Science from IIT Bangalore (2018), which meets and exceeds the requirement. IIT is a prestigious institution. Additionally, possesses all requested certifications: AWS Certified Developer – Associate and Meta React Developer Certificate, plus an extra Google UX Design Certificate, demonstrating commitment to continuous learning.

Project / Portfolio (20%): 9/10 [weighted: 1.80]
! Strong portfolio with three substantial projects demonstrating relevant technical expertise. ReactFlow Dashboard shows open-source contribution and community impact (1.4K stars). NextShop demonstrates full-stack capability with Next.js 14, modern architecture, and payment integration (Stripe). ComponentKit shows design system expertise and real-world adoption. Projects directly leverage required technologies (Next.js, React, TypeScript) and indicate senior-level architectural thinking.

Communication Quality (10%): 9/10 [weighted: 0.90]
! Resume exhibits highly professional structure with excellent formatting, clear logical flow, and strong use of quantifiable metrics (GitHub stars, number of components, startup adoption). Technical terminology is used appropriately and accurately. Grammar is flawless, bullet points are concise and impactful, and the document demonstrates senior-level communication skills suitable for stakeholder interaction.

#2 Priya Sharma ' NO-HIRE Total: 5.35/10

Experience: 4 yrs | Education: B.E. in Information Technology, Pune University, 2019
Skills: React.js, JavaScript, TypeScript, Redux, HTML5, CSS3, Bootstrap, REST APIs, Git, Webpack

Dimension Scores:

Skills Match (30%): 6/10 [weighted: 1.80]
! Candidate has 9 out of 27 required skills (33%). Core skills present: React.js, TypeScript, Redux, React Hooks, Context API, Jest, Git, Webpack, and RESTful APIs. Missing critical skills: state management libraries (Zustand, Recoil), data fetching libraries (React Query, SWR), modern CSS frameworks (Tailwind CSS, styled-components), modern frameworks (Next.js, Remix), GraphQL, Apollo Client, AWS services, and micro-frontend architecture. Has Bootstrap instead of Tailwind/styled-components. Basic coverage but significant gaps in advanced tooling.

Experience Relevance (25%): 4/10 [weighted: 1.00]
! 4 years experience vs 5 required (80% of requirement). Domain experience unclear - worked at Infosys and Technocraft Solutions but no explicit Fintech background mentioned. Projects include HR portal and CRM dashboard but nothing finance-related. Experience is in general enterprise web development rather than Fintech specifically. Seniority level appropriate for mid-level but job appears to require senior-level expertise given the extensive tech stack.

Education & Certifications (15%): 5/10 [weighted: 0.75]

! B.E. in Information Technology from Pune University meets the minimum requirement of B.Tech/B.E. in Computer Science or related field. However, certifications do not match requirements - has Udemy course and HackerRank badge instead of AWS Certified Developer or Meta React Developer Certificate. Education baseline is met but no additional value from certifications.

Project / Portfolio (20%): 5/10 [weighted: 1.00]

! 4 projects listed but mostly generic learning projects. Task Tracker and Weather Dashboard are basic tutorial-level applications. HR portal at Infosys shows scale (10,000+ users) which is positive. CRM dashboard shows enterprise component development. However, no Fintech projects, no advanced architecture demonstrations (micro-frontends, GraphQL, serverless), and no projects showcasing modern state management or AWS deployment. Projects demonstrate competence but not specialization in the required domain or advanced techniques.

Communication Quality (10%): 8/10 [weighted: 0.80]

! Resume is well-structured with clear sections and consistent formatting. Uses concise bullet points with some quantifiable achievements (10,000+ employees). Grammar and spelling are correct throughout. Technical terminology is used appropriately. Demonstrates professional writing standards. Could be enhanced with more specific impact metrics and leadership examples, but overall shows strong communication skills.

#3 Rohit Verma ' NO-HIRE Total: 3.9/10

Experience: 4 yrs | Education: B.Sc. in Computer Science, Osmania University (2020)

Skills: Vue.js, Angular, React, JavaScript, HTML5, CSS3, SCSS, Bootstrap, MySQL, Git

Dimension Scores:

Skills Match (30%): 3/10 [weighted: 0.90]

! Candidate has React and Git from the required skills list (~7% match). Lacks TypeScript, React Hooks, state management libraries (Redux/Zustand/Recoil), data fetching libraries (React Query/SWR), CSS frameworks (Tailwind/styled-components), build tools (Vite/Webpack), testing frameworks (Jest/RTL), Next.js/Remix, GraphQL, Apollo Client, and AWS services. Primary experience is in Vue.js and Angular, not the React ecosystem required for this role.

Experience Relevance (25%): 4/10 [weighted: 1.00]

! Has 4 years experience vs 5 required. Has touched Fintech domain (banking client portal) but only in Vue.js, not React. Most projects are in retail, logistics, and small business websites - not core Fintech. Adjacent domain exposure but wrong tech stack and 1 year short on experience.

Education & Certifications (15%): 4/10 [weighted: 0.60]

! Has B.Sc. in Computer Science which meets minimum requirement, but JD specifies B.Tech/B.E. which are typically considered more engineering-focused degrees. No certifications despite JD listing AWS Certified Developer and Meta React Developer Certificate as desirable. Meets basic education bar but doesn't exceed it.

Project / Portfolio (20%): 3/10 [weighted: 0.60]

! Projects show frontend development capability but mostly in Vue.js and Angular, not React ecosystem. Only one basic React project (portfolio website with CSS animations) which is not substantial. Banking portal project is Fintech-adjacent but wrong stack. No projects demonstrating micro-frontend architecture, state management complexity, or modern React patterns. Portfolio lacks depth for senior-level React role.

Communication Quality (10%): 8/10 [weighted: 0.80]

! Resume is well-structured with clear sections, concise bullet points, and good grammar. Technical terminology is used appropriately and information flows logically. Professional presentation with adequate clarity, though could benefit from more quantifiable metrics and impact statements.

#4 Vikram Nair ' NO-HIRE Total: 2.85/10

Experience: 7 yrs | Education: B.Tech in Computer Science, Kerala Technical University, 2016

Skills: PHP, Laravel, MySQL, PostgreSQL, Redis, REST API Design, Docker, Linux, Nginx, RabbitMQ

Dimension Scores:

Skills Match (30%): 1/10 [weighted: 0.30]

! Candidate has only 2 out of 27 required skills (Git and general REST API knowledge). The candidate specializes in backend PHP/Laravel stack with no demonstrable frontend React.js ecosystem skills. No TypeScript, React Hooks, state management libraries, modern frontend build tools, or frontend testing frameworks are present. This represents less than 10% skill overlap.

Experience Relevance (25%): 2/10 [weighted: 0.50]

! Candidate has 7 years of experience exceeding the 5-year requirement, but in a completely different domain (backend PHP/Laravel development) versus the required frontend React.js/Fintech specialization. No fintech experience is mentioned. The AWS experience is limited to EC2 deployment rather than the required S3, CloudFront, and Lambda services. Domain mismatch is severe.

Education & Certifications (15%): 5/10 [weighted: 0.75]

! Candidate meets the minimum education requirement with a B.Tech in Computer Science from Kerala Technical University (2016). However, the certifications held (MySQL DBA and Docker) are completely unrelated to the required AWS Certified Developer or Meta React Developer certificates. Meets baseline only without exceeding requirements.

Project / Portfolio (20%): 2/10 [weighted: 0.40]

! Both projects (OrderFlow and CachePro) are backend-focused Laravel/Redis implementations with no frontend React.js components. While they demonstrate technical competence and scale (50K users/day, 300+ GitHub stars), they are entirely irrelevant to the React frontend development role. No portfolio demonstrates modern frontend architecture, micro-frontends, or fintech domain expertise.

Communication Quality (10%): 9/10 [weighted: 0.90]

! Resume demonstrates exceptional communication quality with well-structured sections, concise bullet points, quantifiable achievements (50K users/day, 300+ GitHub stars), and appropriate technical terminology. Grammar and formatting are excellent with professional presentation. Only minor room for improvement in adding more specific metrics to some achievements.

#5 Sneha Pillai ' NO-HIRE Total: 1.65/10

Experience: 0.67 yrs | Education: B.Tech in Electronics & Communication Engineering, Anna University, 2023, CGPA: 7.2/10

Skills: C, C++, Python, HTML, CSS, JavaScript, MySQL, Excel

Dimension Scores:

Skills Match (30%): 1/10 [weighted: 0.30]

! Candidate has basic JavaScript, HTML, and CSS knowledge but lacks nearly all required frontend technologies. No React.js, TypeScript, state management libraries, testing frameworks, or build tools. Only 3 of 27 required skills present at a very basic level (11% match).

Experience Relevance (25%): 0/10 [weighted: 0.00]

! Candidate has 0.67 years experience (8 months) versus required 5 years, representing only 13% of required experience. Background is in Electronics & Communication Engineering with no professional software development experience and no fintech domain exposure whatsoever.

Education & Certifications (15%): 3/10 [weighted: 0.45]

! Has B.Tech degree from recognized university (Anna University) but in Electronics & Communication Engineering rather than Computer Science. CGPA of 7.2/10 is average. Does not meet the Computer Science requirement and has no relevant certifications (AWS Certified Developer or Meta React Developer).

Project / Portfolio (20%): 1/10 [weighted: 0.20]

! Projects are extremely basic and academic in nature. Static HTML/CSS college website and CLI Python calculator demonstrate only foundational programming exposure. No React projects, no full-stack applications, no deployment experience, and nothing relevant to the senior frontend role requirements.

Communication Quality (10%): 7/10 [weighted: 0.70]

! Resume is well-structured with clear sections and professional formatting. Grammar and spelling are correct. Language is simple and appropriate for entry-level. However, lacks detailed technical descriptions and quantifiable achievements that would be expected for senior-level communication.
